

Surrealistic Collage

The Art Project for this month is based on Salvador Dali's "Still Life-Fast Moving" painting. We will make a surrealistic collage out of old magazine images. Again, a very simple project for little ones but that can be as complex as you would like it to be.

MATERIALS: You will need construction paper (Color construction paper works better), glue, old magazines and scissors.

ART PROJECT:

Step 1 - Start by selecting various pages from old magazines that have interesting pictures that you like. Choose about 20 pages or so.

Step 2 - After you have the pages you want, start by cutting out the images from the pages that you would like to use in your collage.

Note: You will not use all the pages or images that you cut off.

Step 3 - Put aside the pages you will not use and start arranging the images you cut off on your paper.

Remember that surrealistic art can be whatever comes to your mind and it doesn't have to follow the realistic way things appear to be.

For example, you can put some items upside down, or cut two images and make them into one.

Step 4 - Once you have arranged the images in a way you like, you can start glueing them to the paper.

Step 5 - There is no right or wrong way to do this project.

A collage is a group of objects or things put together to make one piece of artwork. The most important thing is to have fun.
